

Legends of Kalidasia: Rise of the Surakari Figure Assembly Instructions

Box Contents

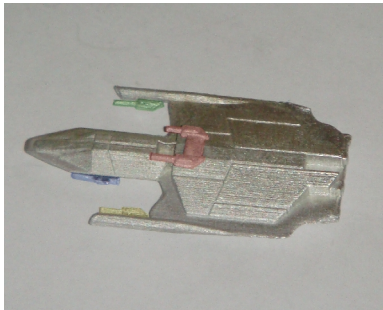

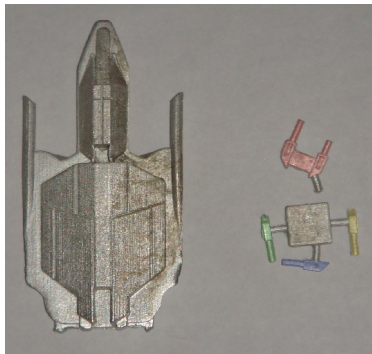

The Surakari Combat Force contains the following components:

- One Surakari Battle Cruiser Hull + Weapons
- One Battle Cruiser Base
- One 1.5" Flight Peg
- Two Surakari Destroyer Hulls + Weapons
- Two Destroyer Bases
- Three Surakari Frigate Hulls + Weapons
- Three Frigate Bases
- Five 1" Flight Pegs
- Six Flight Peg Toppers

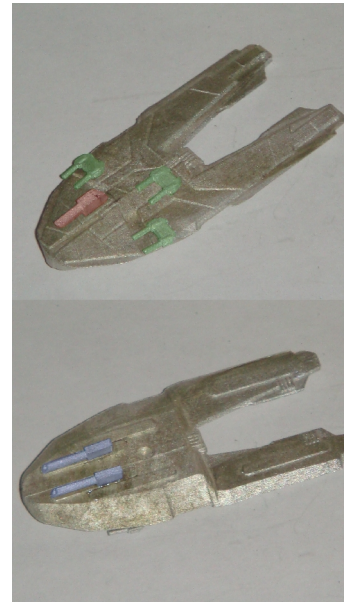

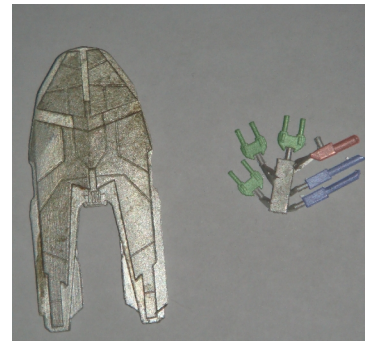

Assembly Instructions

For each of the types of figures, there are two pictures. The first picture shows the figures un-assembled and the second picture shows the complete figure. Each figure in this kit contains one pewter or resin hull and one pewter weapon sprue. In the following pictures, the weapons are colored to identify which portions of the weapon sprue are the turrets. The same colors are then used in the completed photos to properly show the locations of the turrets. Be sure to use proper safety equipment when assembling these figures. Required tools include clippers, a file, and cyanoacrylate glue. Please note that the images here may not exactly match the figures provided in the box.

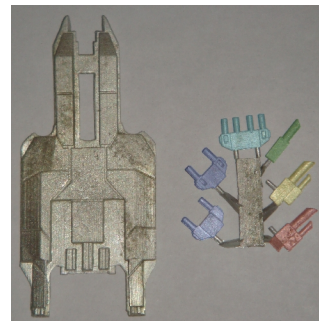

Surakari Frigate

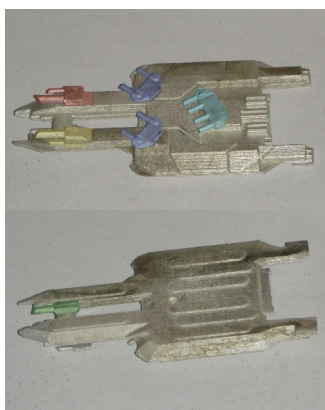

Surakari Destroyer

Surakari Battle Cruiser

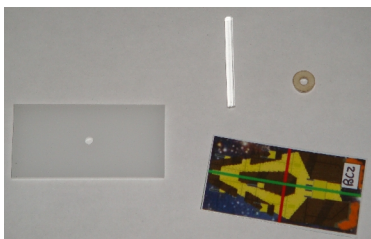

Base Assembly Instructions

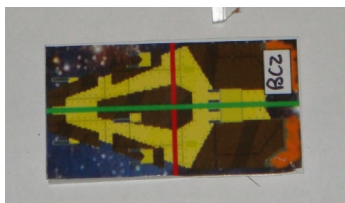

Once the figures have been assembled and painted, they need to be attached to their flight bases. It should be noted that depending on your method of figure storage, it may be recommended to not glue the figures to the flight bases.

Assembling the Flight Bases

Each flight base contains a base, a flight peg, and a flight peg topper. The warship tokens are not included in this pack and can be found in the Rise of the Surakari Complete Battle Kit and the Fleet Packs. The size of the bases will match the size of the game tokens. Battle Cruisers use the 1.5" flight peg and all other ships use the 1" flight peg. (Please note that figure images used here may not match the included figures)

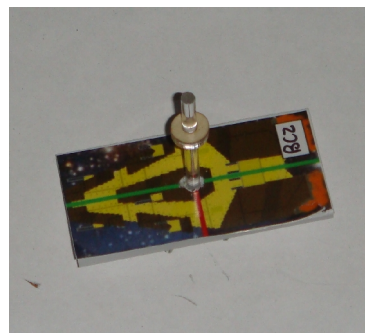

Trim the token down to the size of the base and glue the token to the top of the base.

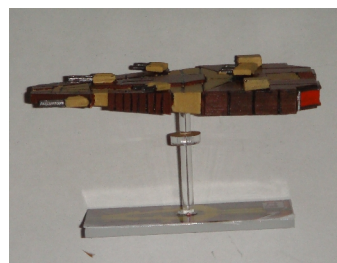

Punch a hole through the token so that the flight peg can be inserted into the base. The base of the flight peg might need to be filed a little bit in order to fit.

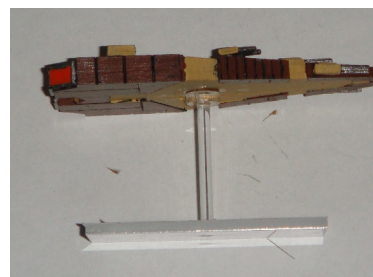

Slide the flight peg topper down the flight peg, but do not glue it in place.

If desired, glue the warship to the top of the flight peg.

If the warship was glued to the flight peg, apply some glue to the warship around the flight peg and slide the flight peg topper up against the warship.
